
Software Engineer

SKILLS SUMMARY

- **Languages:** HTML, CSS, Javascript, MySQL, Python, Typescript, SASS
 - **Frameworks:** Tailwind, React.js, React-router, Express.js, Electron.js, Bootstrap, JQuery, HandleBars
 - **Testing:** JEST
 - **Other Tools:** Node.js, Git, JSON, YAML, APIs, GraphQL, Vite.js, Rollup.js, webpack
 - **Platforms:** Windows, Linux, VS Code, github
 - **Soft Skills:** Algorithms & data Structures, Reverse Engineering, Communication, Problem Solving
-

PROJECTS

Learning Hub | [Link](#)

Learning, retaining, and applying all the information of Data structures and algorithms can be a pain, and I wanted somewhere where I could get all the information I needed without getting hit with an overwhelming amount of information. So, I decided to build Learning Hub. Here you you can study basic algorithms/data structures as well as keep track of you progress on problems on github

Better PSN | [Link](#)

Sony does not allow for a PSN user to view their friend status online, without downloading their hefty mobile (only) application. Therefor, I set out to make Better PSN, were you can view friends online status, games, current activities, trophies, and even(if set to public) Personal Information

Cal Cal | [Link](#)

Late into COVID I decided to focus on my physical health, but when I began to look into the more popular fitness trackers I realized the availability of features are lacking. I wanted somewhere to keep track of my daily nutrition goals, where I could customize my dashboard to look how I wanted and show what I actually cared about, and that's what I did with Cal Cal.

EXPERIENCE

Freelance work

2022 - present

My journey as a freelance web developer has been a transformative experience. From creating responsive websites to developing complex web applications, each project has been a new learning opportunity. It has allowed me to explore various web technologies, frameworks, and tools, thereby expanding my technical skills. Meeting project deadlines, maintaining quality standards, and ensuring client satisfaction have also been things that I've appreciated. Finally, It has taught me the importance of clearly articulating my ideas and understanding the client's requirements to deliver successful projects. This has been an invaluable experience in developing my skills.

EDUCATION

Sacramento City College 2021 - 2022

AA - Computer Science

GPA : 3.8

UC Davis 2022

Full Stack Development

- Front-end/ Back-end Development
- Version Control
- Programming theory

Monterey Trail HS

Cyber Security Club, Comp sci AP, Calculus AP, Physics AP, Engineering AP
